Subject: Lower Passaic River Dredging

Good evening,

My name is Cindy Schottanes and I am currently a graduate student at NJIT. My semester term project will cover the restoration of the Lower Passaic River and am hoping you may be able to provide me with additional information.

Is there any community outreach presentations or information on the project that you use to inform the public about the project? Site photos, pamphlets, slide shows, general facts etc.

Additionally, I'm interested in hearing about the results of the dredging that was recently completed. I've read through the Design Report, but have not found anything on the progress of the removal thus far. Eventually, a portion of the project will discuss the status of the project and results of what has been completed to date. If there is anything you can enlighten me with, I would be grateful.

Thank you for all the help.
Sincerely,

Cindy Schottanes
